I'm having an issue with the compiler, but I don't know why. I was hoping to have my method (below) return a new list consisting of all the lists that the new method (below) passes onto it. public IList< classify(double[][] listOLists) { List

Atlantica Auto Battle Bot Download Reviews by gamers on Steam: I don't know what any of you people expected from this game... 1 out of 5 (0 points, not good enough for first place).. It would'nt be a complete waste if it was added in the battle menu, since its just a PvP mode that has no competitive spirit to it. I agree with one of your guys who said that they could make a bot where you can play with other people who are not aware of the server lag. The game is quite fun to play with one partner, but after a while it becomes quite tedious and repetitive. The battle system is tedious and the levels get very difficult by the third and fourth chapter. It took me a long time to realize that the game wasnt fun without this mod, but once I found that it was, I couldnt beleive that this game was so bad. If you ever play arma 2 or modded into vanilla then this mod doesnt sound like a big deal to you and you will be pleasantly surprised. This bot is pretty well made and not very expensive so you should try it if you play. This bot is useful to those who don't have many players online at once. The AI is fairly smart and unpredictable so it f678ea9f9e
