There are lots of political correctness matters regarding these standards. Not to mention that on Windows the default system UI fonts for CJK languages are having different amount of supported glyphs.

For Windows font fallback, simply use Segoe UI or Calibri (depending on the taste of bigger size or smaller size).

It properly selects between San Francisco Text and San Francisco Display depending on the text size.. Again- this solution is used by GitHub, WordPress, Bootstrap, Medium, Ghost, etc.. Segoe UI Light Font Powerpoint Trial And EducationalIn Japan there are even two variants (industrial and educational variants).. It is used by GitHub, WordPress, Bootstrap, Medium, Ghost, etc If we can use a font already available on the users machine, we can completely eliminate the need to fetch this resource, making load times noticeably faster.. Segoe UI Light Font Powerpoint Trial And EducationalIt is deliberately listed after Segoe UI so that if you're an Android developer on Windows and have Roboto installed, Segoe UI will be used instead.. Suppose that a Simplified Chinese webpage on Windows get fallbacked to a JIS standard font, one will see something similar to a mix-typed paragraph in two different fonts, a typographic disaster.. If this really is a Firefox issue then I think I have to ticket it to their bugzilla.. Rather, I want to understand the problem so that I can take the right action if necessary. 773a7aa168 [Grid 2 Key Generator Download](#)
